SPECIAL RESEARCH PROBLEM STUDENT

Jan. 2020 - Present

- Part of the Jack Watson Research team under **Dr. Thad Starner**.
- Working on developing tools to combat for-hire and other types of plagiarism and catch students that plagiarise over the internet.
- **Ongoing Research Projects - Jack Watson:** An AI agent that can monitor sites like Freelancer and catch students if they try to hire someone; **Examinator:** A tool to catch students who collaborate or cheat in take-home exams; **JackMarker:** A tool to watermark code and detect plagiarised submissions at scale.

Fidelity International

Gurugram

GRADUATE PROGRAMMER

June 2018 - Nov. 2018

- Delivered a functional prototype of a real-time feedback application using web sockets, Django, Redis, and D3.js.
- Worked in the behavioral finance team and helped in designing tools for portfolio managers using React.

Google Summer of Code

Python Software Foundation

PARTICIPANT

May 2017 - Aug. 2017

- Designed a web framework (**Hydrus**) using Flask, to create semantic web-based Restful APIs using a single specs file (Hydra Vocabulary).
- Built a simulation (**Hydra flock demo**) in which multiple servers and clients interact autonomously to patrol a forest region. It acts as the organization's primary demo to show the capabilities of semantic web.
- The project has 148 Stars and 116 Forks and (till date) on Github.

Typinggeek

Delhi

FOUNDER

Aug. 2015 - Dec. 2017

- Founded Typinggeek, a platform to help people learn to type more efficiently using automatically generated meaningful typing lessons.
- Developed **Practice Mode:** Topic based typing lessons; **Challenge Mode:** Invite only typing competitions; **Tutor; Typing Tests;**
- Handled everything from designing mock-ups to user research to development and deployment.
