

About Me

I am a Grad student at the College of Computing, Georgia Tech. I work on a wide variety of technologies ranging from Full Stack Web development to Artificial Intelligence. For the last 1.5 years, under the guidance of Dr. Thad Starner, I've been working on the Research and Development of Counter Plagiarism Technology to assist Online Education at Scale. In my free time, I work on semantic web-related tools at HydraEcosystem.org and mentor Google Summer of Code students.

Education

Master of Science in Computer Science | Machine Learning Specialization

GEORGIA INSTITUTE OF TECHNOLOGY | GPA 4.0/4.0

Atlanta, USA

Jan 2019 - Exp. May 2021

Bachelor of Technology | Electronics and Communication Engg.

DCRUST | GPA 7.05/10

Murthal, India

July 2010 - Apr. 2018

Skills

Languages: Python, Javascript, C++(basic); **Web:** Django, Flask, React, PostgreSQL, Redis, ELK, Auth0, JSON-LD, Unit testing; **AI:** Numpy, Pandas, Sklearn, OpenCV, Tensorflow, Pytorch, Fastai; **Other:** Algorithms, Data Structures, Docker, AWS, GCP, Linux Inkscape, UX Research, UI Design, Web scraping, and a little bit of hacking

Experience

Software Engineer

HYPERSONIX INC

Bengaluru

Aug. 2020 - Present

- Designed and implemented the entire Authentication system
- Improved API performance by about 40% by optimizing the codebase and incorporating compression algorithms like Brotli
- Set up logging mechanism for platform codebase using ELK and Filebeat
- Developed multiple critical customer-facing components like Hints, Guided Tours, and Learning Center

Master's Project

GEORGIA INSTITUTE OF TECHNOLOGY | JACK WATSON TEAM

Atlanta, USA

Jan. 2020 - Present

- Working under **Dr. Thad Starner** to develop tools to Counter Plagiarism and assist online Education at Scale.
- Our research project **Jack Watson** got featured in **Forbes**, **TimesHigherEducation**, and multiple other places.
- Published WIP "Examinator: A plagiarism detection tool for take-home exams" paper at **Learning at Scale 2020**.
- Ongoing research projects include -
 - Jack Watson:** An AI agent that monitors Freelancer websites and tries to catch students if they hire someone to do their work.
 - Examinator:** A similarity detection tool to catch students who collaborate or cheat in take-home exams.
 - JackMarker:** A tool to watermark code/text and detect plagiarism at scale.
 - GitDown:** A tool to monitor public Github repositories and submit take down requests to students.

Graduate Programmer

FIDELITY INTERNATIONAL

Gurugram

June. 2018 - Dec 2018

- Delivered a functional prototype of a real-time feedback application using web sockets, Django, Redis, and D3.js.
- Worked in the behavioral finance team and helped in designing tools for portfolio managers using React.

Volunteer and Other Experience

2019-21	Organization Admin and Mentor , HydraEcosystem.org
2018	Organization Admin and Mentor , Python HYDRA
2018	Tech Speaker , PyCon India
2017	Participant , Python Software Foundation
2017-20	Mentor and Project Reviewer , Udacity
2015-17	Founder , Typinggeek.com

Google Summer of Code

Google Summer of Code

Hydrabad, India

Google Summer of Code

Remote

Delhi

Relevant Coursework

Georgia Tech: Artificial Intelligence, Machine Learning, Computer Vision, Reinforcement Learning, AI Ethics and Society, Data and Visual Analytics, Knowledge-Based AI, Information Security and Policies, Graduate Algorithms, Intro to Operating Systems

Udacity Nanodegrees: Computer Vision, React Developer, FullStack Web Developer, React Developer

Fast.ai: Practical Data Ethics, Practical Deep Learning for Coders
